

## Assignment : Nested If-Else

### Percentage program :-

```
#include <stdio.h>
```

```
int main()
```

```
{    int per
```

```
    printf("Enter percentage :");
```

```
    scanf("%d", &per);
```

```
    if (per > 80)
```

```
    {    printf("A grade"); }
```

```
    else if (per < 80)
```

```
    {    if (per >= 70)
```

```
        {    printf("B grade");
```

```
        }
```

```
    else if (per >= 70)
```

```
    {    if (per >= 60)
```

```
        {    printf("C grade");
```

```
        }
```

```
    else if (per < 60)
```

```
    {
```

```
if (per >= 45)
```

```
{ print ("D grade");
```

```
}
```

```
}
```

```
else if (per < 45)
```

```
{
```

```
print ("FAIL");
```

```
}
```

```
}
```

o/p

Enter percentage : 78

B grade.
